Rise up.

ABOUT US

INDIC EDUCATION IS A PLATFORM WHOSE VISION AND PHILOSOPHY IS TO PROVIDE HOLISTIC DEVELOPMENT FOR TEACHERS IN THE COUNTRY.

Our organization aims to address challenges faced by educators in the 21st century by providing curated solutions and support towards their evolving needs. Indic Education is looking to revitalize the education system by helping educators across the globe develop themselves with efficient tools and resources. We believe that we are in a constant need for new knowledge and skills to formulate progressive solutions. We are deeply perceptive about adopting new measures and methodology that will advance your proficiencies.

Our culture is outlined to advance teaching and learning functions strategically and is built around these 3 pillars :

Collaboration

We believe that together we are able to face the new world by sharing our insights and uplifting each other.

Open Minded

We encourage an inclusive, unbiased and approachable attitude that nourishes and allows positive change.

Responsible

We know that in identifying our purpose and place, we become more receptive to change and accountable for the future that we want to build.

ART OF TEACHING

Change is in the air. The world is changing rapidly connecting, adapting and evolving. With this change, the style and approach to teaching must also change and we need to bear in mind the fact that students of today are completely different from the students of the yesteryear. It's the responsibility of educators to acquire new classroom skills, absorb new pedagogies and focus on developing the problem-solving, critical thinking, creativity, communication and collaboration skills of our students and become a skilled 21st century teacher.

What does it take to be a 21st century teacher?

Tech Savvy

Having a balance between tech and non-tech tools in classrooms

Collaborative

Working with others while sharing expertise, experience and knowledge

Adaptive

The ability to adapt to new age curriculum and the use of imagination to teach in creative ways

Lifelong Learners

Staying connected with new age trends and elements in education

Advocates

Conversing and discussing new age education methodologies and ideas among members of the education community

TEACHING VALUE INDEX

Teaching Value Index (TVI) is an online assessment program that measures the core competencies and new age teaching skills of an educator. The tool is designed by experts in the field of education and allows teachers to understand the gap in critical performance parameters. Teaching Value Index, unlike other existing solutions does not focus on the subject matter expertise of teachers but on the Art of Teaching. It is essential for teachers to equip themselves with changes and development. TVI is designed to help teachers to prepare for the future.

Five core benefits of taking TVI

Helps you get adept with new age skills and methodologies of teaching

Brings in international standard of teaching

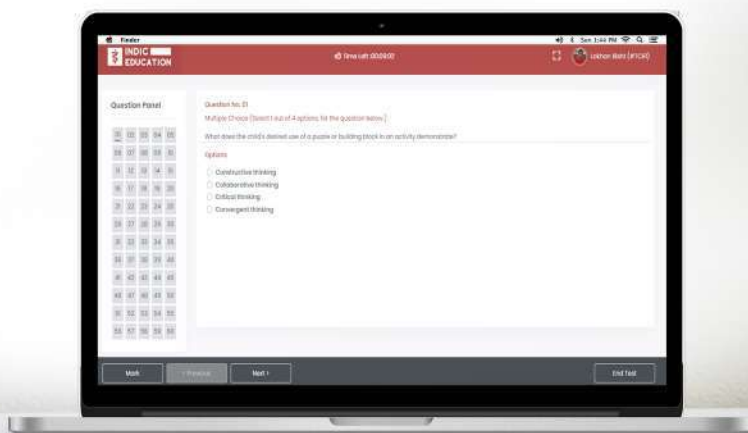

Equips you with holistic skills to become a better teacher and educator

Enables understanding of your strengths other than your subject matter expertise.

Identifies skills that work towards your career progression and advancement.

PARAMETERS MEASURED

Design and Plan

A curriculum plan made by the teacher, based on desired learning outcomes for the student. Here we measure the knowledge, blending of methodologies, practical day to day utilization, thematic usage of 21st century skills.

Pedagogy

The theory and practice of teaching. It involves a range of techniques. Here we measure pedagogical knowledge and effectiveness of the techniques used.

Classroom Leadership

Defines routines and expectations in classroom behavior for effective learning of the students. We measure awareness of techniques, practical usage, inclusivity, teacher behavior and communication.

Assess and Remediate

Evaluating student learnings vis a vis their expected learning outcomes and then apply relevant remediation techniques to improve learning outcomes. Here we measure the relevance of Why, What and How of assessments.

Safety and Protocol

The area concerned with removing or reducing children's exposure to harmful situations. We measure, in a school environment, the knowledge, awareness, sensitivity and the effectiveness of day-to-day safety protocols

Know Your Student

It is the study of conscious and subconscious childhood development. We measure, in a school environment, the teacher's understanding and response to various behaviors, with special attention to children with learning challenges.

WALK THROUGH

METHODOLOGY & MEASUREMENT

TVI has been developed by education experts who have carefully categorized the assessment into various parameters. These parameters when assessed upon gives an opportunity to educators to assess their readiness levels, identify skill gaps and enhance performance at every level.

Each competency/performance indicators includes sub competencies, some of which are foundational, for teachers who are beginners, and others are advanced, for teachers who are experienced. Educators are grouped as per the levels they teach i.e., Pe-Primary, Primary, Middle School and High School; and will be evaluated against the years of experience in the field.

The teacher will be assigned a rating as per the score achieved in the assessment in the following order:

The assessment includes situational and fact-based questions that tests the knowledge, skill and behavior of teachers when confronted with different classroom scenarios. Competencies are divided into several indicators that include possible evidence and responses to consider when assigning a rating. Teachers can take the self-assessment to determine how they exhibit these foundational and advanced competencies and identify areas of development and growth.

BENEFITS OF TAKING TVI

For Institutions:

For years educational organizations have conducted different forms of performance evaluations and appraisals. These methods might have been efficient but with the introduction of new age education methodologies it is of vital essence to have an evaluation system that assesses teachers on the 21st century parameters.

Benefits that you would get as an institution in implementing this tool in your schools are:

An efficient way of conducting teacher evaluation when compared to traditional methods.

Validation of teachers in 21st century skills and competencies.

Curating individualized training programs and workshops offered to teachers from insights gathered in the assessment.

Supports development of teaching effectiveness and efficiency in classrooms.

Enhances the quality of education provided at your institution.

For Teachers:

The field of education has seen a rapid transformation over the past decade. New age teaching skills are overshadowing traditional methods of delivering education. As a teacher it is important to keep yourself adept to new age ideas and techniques that have been widely implemented in numerous institutions from across the globe.

The TVI is a self-assessment tool that would enable you to build proficiencies in these areas and would further benefit you in the following ways:

Supports personal growth and career development in the education industry.

Helps validate yourself in new age and 21st century teaching methodologies, skills that are in demand at many institutions.

Enables understanding of your strengths other than your subject matter expertise.

Lays a foundation for you to develop holistic skills to become a better teacher and educator.

Builds your resume and creates tremendous opportunities in your career progression.

Take the assessment today
and let us

Help you prepare for tomorrow.
